

Patient Engagement tools session #1 *(consultation organised by PARADIGM)*

The PEOF2020 takes place whilst the public consultation on the tools produced by PARADIGM is still underway. The session will present three patient engagement tools, two of which will include case study examples, to support the last iterative round of their development.

The key aim of the session is to improve the tools' usability and practicality for the patient engagement community, using participant feedback.

The following tools will be discussed during this session:

1. Raising awareness on managing competing interests in a multi-stakeholder environment
2. Recommendations on how to identify the right match for the right patient engagement activity
3. Guidance for reporting and dissemination of patient engagement activities

Expected outcomes of the session:

- Overall feedback on the usability and practicality of the tools
- Refinement of the presented tools using insights and suggestions from participants
- Raise awareness about the importance of reporting and dissemination of patient engagement activities
- Promote discussions around certain aspects of patient engagement (e.g. involvement of patients, dissemination channels, implementation of the suggested tools)
